Soccer Shots offers a developmentally appropriate curriculum for each of our groups. Within each program, Soccer Shots emphasizes the importance of character development by incorporating a word of the week into each session and discussing its meaning and relevance on the soccer field and beyond. Through this character development, skill instruction, creativity, and fun, we aim to positively impact children.

The Classic Program teaches the technical skills of soccer and encourages greater confidence with ball control, using both feet, starting and stopping and changing directions by incorporating basic moves. The focus of these sessions is to individually become skilled at possessing the soccer ball and manipulating it in different ways. Through creativity, positivity, and fun, we encourage new challenges and increased confidence in the classic program.
